

### Note on the laptop for the AMScomsystem

The laptop is supplied by different manufacturers, so we are **not fixed on brand or model**. Our distributor looks for **certain components of the hardware**, which ensure a **smooth interaction** of the laptop with our devices.

The computer-assisted handling of the BIOWAVES is highly computationally intensive and much more complex than it seems. Therefore the device is opened by our supplier in order to check the **quality of the installed components**. In addition, he examines the system **Laptop/AMScomsystem** with an external test by **preinstalling our software** and checking for **100% suitability** through various test runs.

Only after a successful examination the laptops are delivered to us. We pass them on to our customers **without surcharge to the purchase price**.

The **AMScomsystem software cannot be purchased without the laptop**. We also recommend that our customers do not install additional programs on the computer with the **AMScomsystem**. The laptop should be used **solely to control our devices**. It is **not possible to install the AMScomsystem on an Apple computer**.

For training on the use of the software, any questions or problems, we can help you at any time with the **remote maintenance module** from our office.

### Devices for the AMScomsystem

#### MEDISEND®super III / C:

Magnetic field devices for application in your practice.

#### MEDISEND®super III

#### MEDISEND®super C

#### WAVE TRANSFER C:

Copy and save bioinformation, analog and digital.

#### METRONOM C:

Small hand held device for home use with storing space for BIOWAVES.

Learn more about our devices in the particular product brochures or our catalog. A complete listing of all digitized BIOWAVES can be found in our **BIOWAVE catalog**. Please email us to ask for the documents or visit our website: [info@ams-ag.de](mailto:info@ams-ag.de) / [www.magnetotherapy.de](http://www.magnetotherapy.de)

## AMScomsystem

### Technical data:

- Laptop:** Laptop with Windows 10, 15.6 Zoll HD screen
- Size:** depending on model approx. 26 x 38 cm / 10.2 x 15 inches
- Weight:** depending on model approx. 2.3 kg / 5.1 pounds
- Battery:** Rechargeable battery of laptop
- Scope of delivery:** Laptop with Windows 10 and installed **AMScomsystem**, USB footswitch and „Starter package“ (approx. 60 digitized BIOWAVES), manual

**Warranty:** 2 years

**Training:** By purchasing the **AMScomsystem** with a corresponding large device, you will of course receive training on how to use the software.

We usually do this via telephone. At the same time we have remote access to your laptop. We will have already installed the required remote module on the computer.

This allows us to lead you through the application process on your own screen step by step.

### Order number: 902

To see the current USD price and place your order please check our website and online shop: [www.magnetotherapy.de](http://www.magnetotherapy.de)

### BIOWAVES:

The BIOWAVES can be purchased separately in eight different packages. Ask for our **BIOWAVE catalog**.

Please order... **by telephone: +49 (0) 7934 / 99 34 89 – 0 or in our online shop [www.magnetotherapy.de](http://www.magnetotherapy.de)**

Thank you

**AMS GmbH**  
Advanced Medical Systems  
Hauptstr. 26 • D-97990 Weikersheim • GERMANY  
Tel.: +49 (0)79 34 / 99 34 89-0 • [info@ams-ag.de](mailto:info@ams-ag.de) • [www.magnetotherapy.de](http://www.magnetotherapy.de)

## AMScomsystem/ BIOWAVES

Digital testing and application

With our control software **AMScomsystem** you can use **digital bioinformation**.

### Examples for bioinformation:

- Homeopathic remedies
- Bach flowers, phytotherapeutics
- Schuessler salts
- Nosodes
- Organ preparations
- Environmental toxins and many substrates more

If these bioinformation are stored in a digital form as a file in the **AMScomsystem**, we call them **BIOWAVES**. We offer you more than 6,000 already digitized media bundled in eight different BIOWAVE packages.

### The C-Generation

In order to be able to use the **BIOWAVES**, a **laptop with the AMScomsystem** must be connected to one of our devices of the „**C-Generation**“. The C-Generation includes:

- **MEDISEND®super III** and **MEDISEND®super C**
- **WAVE TRANSFER C**
- **METRONOM C** (in combination with a large device of the C-Generation)

The various devices serve different purposes as soon as they are connected to the **laptop and the AMScomsystem**:

#### 1. MEDISEND®super III / MEDISEND®super C

With these two large devices, you can use the **AMScomsystem** to **support the testing of suitable BIOWAVES** and using them during an **application**. The selected BIOWAVES are transmitted with the **pulsating magnetic field** emitted by the devices.

#### 2. WAVE TRANSFER C

With the WAVE TRANSFER C **any substrate can be digitized**, i.e. turned into a **BIOWAVE** and saved as a file in the **AMScomsystem**. If required, each BIOWAVE can be **analogized**, which means reconverted and transferred and stored to an aqueous carrier solution. The WAVE TRANSFER C is **not** a therapy device.

#### 3. METRONOM C

Our **hand-held device METRONOM C** has a **storage space for a BIOWAVE file**. It is possible to use this storage space to save the information of a **single or a complex remedy**. Therefore the METRONOM C has to be **connected to a large device with the AMScomsystem**. The stored digital information can be patched in to the **pulsating electromagnetic field** that is generated by the METRONOM C with each of its five programs.

### WAVE TRANSFER C

### METRONOM C

# AMScomsystem

## Use of digital bioinformation

### Functional areas

The AMScomsystem comprises three cross-linked functional areas:

#### 1. Personal data modul:

- Documentation and management of personal and treatment data.

#### 2. Device modul:

- Control of device settings and storage of treatment templates and programs. Also support for testing selected BIOWAVES.

#### 3. BIOWAVE modul:

- Digitization (only possible with the **WAVE TRANSFER C**), storage and management of bioinformation as single and complex remedies in the form of so-called BIOWAVES.

### BIOWAVES

**BIOWAVES** - this is what we call all **information from substrates** that have been digitized by using our **WAVE TRANSFER C** device. These can be homeopathic remedies, Bach flowers, nosodes, Schüssler salts etc.

Every human being, every plant, every remedy constantly gives its own characteristic vibration spectrum to its surrounding. All these oscillations / frequencies are measurable and thus also detectable.

Due to modern microelectronics, it is possible to **capture and digitize** frequencies of substrates (e.g., homeopathic remedies, nosodes, etc.) with the **WAVE TRANSFER C** and store them as a so-called **BIOWAVE** on a hard disk.

digital information →

Our body is not able to understand this information in digital form. For this reason, the digital bioinformation has to be retransformed into an **analogous** form, which is **intelligible to the organism**.

For this purpose it is possible to use the **MEDISEND®super III / C** or the hand held device **METRONOM C** to modulate the information onto a pulsating electromagnetic field and transfer it to humans or animals.

Another possibility is to **transfer** the digital information to an aqueous solution using the **WAVE TRANSFER C** and thus retransform it to an **analog** information.

It is well known that more and more homeopathic remedies disappear from the market due to law formalities. **Digitization** is a possible way to secure the benefits of these remedies for the future.

BIOWAVE-catalog →

You find a **complete listing** of all digitized BIOWAVES in our **BIOWAVE catalog**. Please email us to ask for the document or visit our website for download: [info@ams-ag.de](mailto:info@ams-ag.de) / [www.magnetotherapy.de](http://www.magnetotherapy.de)

Here you can find us on the internet: [www.magnetotherapy.de](http://www.magnetotherapy.de) / [info@ams-ag.de](mailto:info@ams-ag.de)  
Or give us a call: +49 (0) 79 34 / 99 34 89 - 0

usage →

On the following page you will find some information about the **usage of the AMScomsystem** with the various possible devices. Due to the limited space available in such a product brochure, the statements are brief and clear. You can find out more about the respective devices described on our **website**. In addition, you will find some **screenshots of the AMScomsystem software** for better visualization. Of course, you can also **call us** to ask your questions personally. We are happy to help.

## Possibilities of application with the AMScomsystem

In order to understand the use of the **AMScomsystem software** with the available devices, it is useful to first familiarize yourself with the application of the respective devices (**MEDISEND®super III / MEDISEND®super C**, **WAVE TRANSFER C** and **METRONOM C**). For this purpose, please refer to the corresponding individual brochures or check out our website: [www.magnetotherapy.de](http://www.magnetotherapy.de)

### AMScomsystem with MEDISEND®super III / MEDISEND®super C

If the laptop with the **AMScomsystem** is connected to the **MEDISEND®super III / MEDISEND®super C**, it can support you in the **testing and application of the BIOWAVES**.

Instead of an analog transfer of substrates using the MEDICUP, you can use the **digitized information - BIOWAVES** - with the **AMScomsystem**. To determine suitable BIOWAVES with a test of your choice, select the information to be tested in the corresponding mask from your BIOWAVE stock. The selected BIOWAVES are then transmitted successively with the **pulsating magnetic field** of the connected device to the person to be tested. Thus they can be checked for compatibility with the application. For this purpose, you can use a **test method** which suits you best - this can be testing with a tensor, kinesiology, EAV, RAC and more. With the included **footswitch**, you can **mark the substrates** according to the test result without having to use your hands for the mouse.

After testing, the positively tested and marked substrates are automatically transferred to the application module and thus transmitted with the magnetic field frequency selected by you. You can also start an application with an electromagnetic field and BIOWAVES even **without a previous test**.

It is possible to **save tests**, to recall and to re-evaluate them in a next session. You can also create **test templates**, which can be selected with a mouse click to **quickly start the test**.

In the **personal data module**, you fill in your patient data so that each application can be saved and documented **individually**. You can also **print** the tested BIOWAVES.

AMScomsystem with MEDISEND®super III / C

### AMScomsystem with METRONOM C

The **hand held device METRONOM C** has a **storage space** where **digital bioinformation (BIOWAVES)** can be stored as **single or complex remedies**.

Thus the METRONOM C can be used for **individual application at home**. It has **five selectable programs** of different magnetic field frequencies. The stored **BIOWAVE** can be patched in to **each of the five programs** to be transmitted as an exogenous bioinformation with the pulsating electromagnetic field.

Some therapists using a large device with the **AMScomsystem** for their practice, have one or more METRONOM C devices that they **rent or lend to their patients for home use**.

A connection of the METRONOM C device to the computer with the **AMScomsystem software without a MEDISEND®super III / MEDISEND®super C or a WAVE TRANSFER C is not possible**.

AMScomsystem with METRONOM C

### AMScomsystem with WAVE TRANSFER C

If you want to **transfer** the digitized BIOWAVES onto a **carrier medium, e.g. physiological salt solution** or another aqueous solution, you will need the **WAVE TRANSFER C** in combination with the **AMScomsystem**.

With this device, it is also possible to **convert** all analog substrates and remedies into **digital files**. So you are able to create your own **BIOWAVES**.

The WAVE TRANSFER C is **not a therapy device**. It **does not generate a pulsating magnetic field**, but is **exclusively** designed to convert bioinformation such as homeopathic remedies, Bach flowers, Schuessler salts, nosodes, phytotherapeutics etc. into digital data or transfer them to carrier media.

AMScomsystem with WAVE TRANSFER C
