

CEPES-Laser®

The only laser with pulsating electromagnetic field and substrate transients.

Application on:

- acupuncture points
- meridians
- skin areas
- chakras
- scars and more

Many know and love their CEPES-Laser® more than over 20 years – some practices, clinics, home remedy kits and handbags would be unimaginable without it.

Our customer's feedback showed to us, which features are still desired and what we could still improve.

Of course also the new CEPES-Laser® unites the established combination of:

- Red light
- Pulsating electromagnetic field
- Transfer of information/substrate transients

The CEPES-Laser®...

Red laserlight →

works with red laserlight. You can adjust the beam's diameter with a slide switch to either approx. 0.7 or 0.2 cm (approx. 0.28 or 0.08 inches).

Magnetic field in three frequencies →

generates a pulsating electromagnetic field.

You can chose three different frequencies:

- 7.8 Hz – the well-ried and proven balancing principal value of the Schumann frequencies
- 33 Hz – for stimulating application respectively to tone an acupuncture point
- 3.0 Hz – for relaxing application respectively to sedate an acupuncture point

continuous or blinking Light →

has two setting modes:

- steady light with a continuous electromagnetic field
- light and magnetic field are interrupted by a frequency of 1,2 Hz (Nogier frequency)

usage and substrat transients →

is applicable to acupuncture points, meridians, skin areas, chakras, scars and more. It has also good effects for pain relive - simply work with the laser on the affected area. You can either work solely with one of the three frequencies or you use additionally the drill hole in the laser housing to insert an ampoule for substrat transients. This way you can easily transfer the information of for example homeopathic remedy or other substrats. For transferring the information the main carrier is the the pulsating electromagnetic field.

with plug in tip →

has a plug in tip made of stainless steel for better positioning on acupuncture points. Moreover, it is useful to get through the fur of animals for treatment.

CEPES-Laser®

Versatile usage

Humans at any age as well as animals – they all response very well to the painless and hazard-free therapy with the softlaser.

Did you know that the depth of penetration of the laser light is independent of the strength but only dependent of its wavelength?

This is why we decided also for our new model to use only a small power of ≤ 1 mW.

your benefit

- no technical inspection needed
- no safety glasses necessary
- low asset costs compared to stronger lasers

Red laser light has a penetration depth of 2 cm (approx. 0.79 inches). The pulsating electromagnetic field that is generated at the same time even has a penetration depth of 30 cm (approx. 11.81 inches).

Dr. W. Ludwig's® devices are identified with the arrow symbol. This symbol stands for generating an electromagnetic biofield as in undisturbed nature. The frequency spectrum of the 64 essential trace elements (Geomagnetic frequencies) is generated by a worldwide unique process.

Technical Data:

Laserlight:	fluctuating red wavelength $\lambda = 650$ nm $p \leq 1$ mW (Laser class 2 according to DIN EN 60825-1: 2008-05)
Magnetic field frequencies:	3.0 / 7.8 / 33 Hz
Strength of magnetic field:	0.9 μ Tesla
Batteries:	two batteries 1.5 V type AAA
Weight:	83 g (2.9 ounces)
Size:	1.8 x 3.4 x 15.7 cm (approx. 0.7 x 1.3 x 6.2 inches)
Scope of delivery:	Laser with batteries, plug-on tip, case, three glass ampoules (10 mm / 0.4 inches), manual
Warranty:	2 years

Buy the CEPES-Laser® without any risk!

After purchasing you can return the device within 90 days with a money back guarantee. You will see this also on our invoice. If you return the device in perfect condition within the 90 days, we will give you a full refund (less shipping costs).
