

MEDISEND®

The little Ludwig

Our smallest portable Magnetic Field Device

You can use the **MEDISEND®** with its pulsating electromagnetic field according to your requirements on lack of concentration, exhaustion, meteorsensitivity, sleeping troubles, electrosensitivity and more. Choose one of its nine programs and simply put the device close to you (i.e. on your solar plexus or in your pocket). It fits in your hand and has a physiological range of approximately 60 cm (23.6 inches) in diameter.

Many customers call our **MEDISEND®** lovingly „The little Ludwig“ and don't want to miss this small device anymore. It is an everyday companion and is carried around everywhere in jacket and trouser pockets.

The **MEDISEND®** is the first device with a pulsating electromagnetic field developed from **Dr. W. Ludwig®**. It is sold on the market for more than 40 years.

MEDISEND® stimulates and stabilizes the ability of regulation

Besides the different programs/frequencies you can select from, the **MEDISEND®** always also generates the **Geomagnetic frequencies** - regardless of the frequency you choose. In order to keep the **MEDISEND®** small and handy, it is built without the generator for the Solar frequencies. You find more information to Schumann, Geomagnetic and Solar frequencies inside this brochure.
